

This security feature can be disabled. To disable the pop up warning message about possible harmful or unauthorized Clipboard access, follow the steps below:

1. Go to Tools -> Internet Options.
2. Go to Security tab.
3. Select “Internet” zone, then click on “Custom level...” button.
4. Scroll down to “Scripting” section (at the bottom few).
5. Under “Allow Programmatic clipboard access” option, check or select (tick) Enable. Default action for this option is Prompt, which cause the pop-up message whenever there is any attempt to access the Clipboard.
6. Click Ok twice to exit from [Internet](#)

Options.

Changing the preference to Enable for “Allow Programmatic clipboard access” option can increase [security risk](#). You can set it to Disable to disallow all website’s access to Clipboard’s resident data. However, the better and more [secure](#) alternative is to edit the “Allow Programmatic clipboard access” setting for “Trusted sites” zone (steps same as above, only that you select “Trusted sites” in step 3 instead of “Internet”), and add the websites that you trusted and selected into Trusted sites zone.
